

## Column Formers / Pier Liners / Void Forming Tubes

Millform's large format steel spiral duct is a high strength cost effective Column Former / Pier Liner / Void Former.

Ideally suited to permanent or temporary liner applications.

Made from commercial grade 0.6 or 0.8 BMT galvanize steel, this product is lightweight easy to transport, economically priced yet super strong to withstand the rigors of being used for concrete formwork.

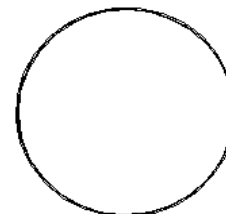

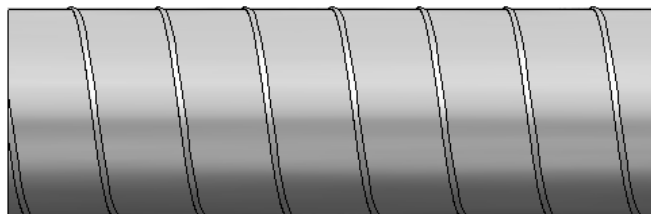

Our Spiral duct is machine made to standard lengths of 4 or 3 metre, but can be made to any specific transportable length if required. In addition this product is easy to cut to specific sizes with any angle grinder fitted with a 1 mm cutting disk.

### Typical Applications

- Pier Liners
- Column Formers
- Well Casings
- Void forming in Concrete
