

# Fact Sheet – In-House Engineering

## Common Issues

Often in the industry there is a lot of short cuts and copying. Without true engineering resources there is a risk of lack of innovation, leaving the products open to competition from low quality imports, old technology or run down equipment that produce poor quality and out of specification profiles. This can lead to lost productivity and poorly finished projects.

## Millform Advantage

At Millform we have over 40 years of in house design, drafting and Roll Forming engineering experience. This allows us to develop and support our customers with efficient customisation and product enhancements. We have developed a global network of partnerships that allow us to offer best practice solutions. Our engineering standards are embedded in our standard operating processes of ISO9001. The market has recognised this expertise and quite often our competitors hire our expertise to design their production systems.

### Millform Products

22 Shale Place, Eastern Creek NSW 2766 – Ph 02 9832 6900

10 Racecourse Road, Albury NSW 2640 – Ph 02 6025 4377
